10 exercises: Legs & Core

How It Works

You brush your teeth twice a day for 2 minutes each time.
That's 4 minutes you're just standing there.

BrushFit turns that dead time into a workout.

The rules are simple:

1. **One hand holds the toothbrush. Always.**
2. **One exercise per brushing session.**
3. **Two minutes. That's it.**

No gym. No equipment. No schedule.
Just your toothbrush and whatever's in your bathroom.

This free sample gives you 10 exercises:
6 for your legs and 4 for your core.

That's enough to build the habit and see results.

> *** Pro Tips Before You Start**
>
> **Use an electric toothbrush.**
> It does the brushing for you so you can focus on the exercise. Plus most have a built-in 2-minute timer.
>
> **Brushing with your non-dominant hand feels weird at first.**
> That's normal. You'll get used to it in a few days. Stick with it.
